

NEWS RELEASE

Paramount Bed Group to Exhibit at “H.C.R.2026 International Home Care & Rehabilitation Exhibition”

TOKYO, Japan, September 29, 2026 - Paramount Bed Co., Ltd. (Head Office: Koto-ku, Tokyo; President & CEO: Tomohiko Kimura) and Paramount Care Service Co., Ltd. (Head Office: Sumida-ku, Tokyo; President: Tatsuya Udagawa) will participate in "H.C.R.2026 – The 53rd International Home Care & Rehabilitation Exhibition & Forum", to be held at Tokyo Big Sight (East Halls) from Wednesday, October 7 to Friday, October 9, 2026.

This exhibition is one of Asia's largest international trade fairs for welfare and rehabilitation equipment, showcasing products and services from around the world and attracting significant attention both in Japan and overseas.

Paramount Bed will showcase care technologies designed to reduce the burden on caregivers and enhance users' quality of life (QOL), as well as home-care beds and air mattresses. In addition, Paramount Care Service will introduce its original rental product lineup, PARA CARE SELECTION.

In addition to showcasing our latest care technology solutions and products designed to support nursing care, we will also exhibit the Rakusho Fit Series home-care bed and the Kokochia Yuki Rise air mattress, both launched last year:

- **Nemuri CONNECT** – A monitoring support system that was initially developed for nursing care facilities as a Wi-Fi-enabled solution. With the addition of mobile connectivity, it is now also available for use in home care and home healthcare settings without requiring a Wi-Fi connection.
- **Toilet DIARY** – An automatic toileting record system that logs restroom visits, toilet use, and excretion data to support toileting care in nursing facilities.
- **Diaper COLOR** – A stool-detection sensor that attaches to diapers and helps reduce caregiver workload.

- **Espacia Series** – Electric nursing beds with integrated weight-monitoring functionality for care facilities. By simply getting on and off the bed, users' weight can be measured and automatically recorded, helping reduce the burden on caregivers associated with routine weight measurement.
- **Rakusho Fit Series** – Home-care beds featuring the Fit Line Bottom, which helps reduce user slippage during backrest elevation, an LCD touch-panel controller with adjustable display settings, and a Panorama-type design without a footboard, making it easier to accommodate individual user needs.
- **Kokochia Yuki Rise** – An air Mattress with Backrest Elevation Support Function. Three support cells inflate in coordination with the bed's backrest elevation to support easier swallowing and help users maintain a comfortable posture.

Presentation Events

At the presentation area in the center of the Paramount Bed booth, we will host short presentations of approximately five minutes each, five times daily, covering four key themes:

①Nemuri CONNECT, ②Rakusho Fit Series, ③Kokochia Yuki Rise, ④Continence Care Solutions – Toilet DIARY and Diaper COLOR

In addition, through panel displays, we will introduce the Paramount BED RE-BED Project, our sustainable initiative to collect and recycle used beds, the JIS standards for welfare equipment, and Monica Seryu, a para canoe athlete supported by Paramount Bed.

■Paramount Care Service Exhibition Highlights (East Hall 1, Booth 04-06)

Paramount Care Service will exhibit its original rental product line “PARACARE SELECTION,” including the Gra-Fit Turn wheelchair, which was co-developed with Paramount Bed.
